

# PSYCH-K®

Basic Workshop • February 13th – 14th

Henry Ford once said, **“if you believe you can or if you believe you can’t– you’re right.”** Quantum theory suggests that your life is a reflection of your beliefs. If these statements are true it would obviously benefit us greatly to possess positive beliefs. The catch however, is that the majority of what we hold to be true is held below the level of our awareness in the more powerful subconscious mind. Many of these beliefs are negative and sabotage our goals. PSYCH-K® is a powerful set of tools that not only allows us to identify these beliefs, it also liberates us from them by transforming them into positive empowering beliefs that enhance our health and help support us in the attainment of our desires.
